## **Repo matching now available to the buy side for the first time via TRAX2**

(LONDON, UK) The International Capital Market Association (ICMA) Ltd is pleased to announce that buy side firms can now use TRAX2 for repurchase agreements (repo). For the first time, both buy and sell side firms can match and report repo trades using the same system ([www.TRAX2.org](http://www.TRAX2.org)).

This innovative market offering was made possible by ICMA's development, in cooperation with market participants, of a unique fund ID database which allows buy side firms to identify individual trades for specific funds and so successfully automate the confirmation process integrating TRAX2 with their own systems.

Robert Galione, Head of Operations, European Credit Management Ltd. Commented: "TRAX2 fills a major gap for us and completes our electronic confirmation coverage. ECM's policy is to PV forward cash flows making far leg reconciliation essential for the control of our business. TRAX2 will automate this and make our rapidly expanding repo business much more scalable".

Kevin Milne, Managing Director, ICMA Ltd., commented: "We are pleased to offer repo participants, in both buy and sell side firms, increased matching opportunities, and more efficient reporting which will translate to a significant reduction in their operational risk. We are continuing to develop the TRAX2 system to address the evolving needs of the market".

**ICMA/2007/15**

The repo market is the fastest growing sector of the European capital market, now valued at Eur 6.4 trillion (December 13, 2006).

ICMA worked closely with the operations committee of the Association of Foreign Banks (AFB), the European Repo Council (ERC) and ICMA members to design TRAX2 to include the needs of repo market participants.

Ian Holden, Operations Manager, European Credit Management Ltd., commented: "By using TRAX2 we will reduce significantly both our costs and operational risk. It will minimize our manual intervention and make our rapidly expanding Repo business much more scaleable"

Repo is still traded in large volumes over the counter (OTC) which can lead to increased levels of operational risk through human error causing delayed settlement and verification. TRAX2 allows firms to manage their operational risk effectively by matching trades that have been transacted 'over the counter' i.e. not on an automated trading system, in all asset classes in real time with their counterparties, so virtually eliminating failed trades at settlement. An additional benefit of TRAX2 is that users can fulfil their transaction reporting requirements in a range of financial instruments to a number of specified regulatory authorities throughout the EU.

- Ends-

**Notes for editors**

**1 TRAX2**

TRAX2 is the post-trade, pre-settlement, trade matching & regulatory confirmation system for the OTC market. It processes all financial instruments/asset classes and is now available to both the sell side and buy side.

TRAX2 offers full repo matching capabilities and is tailored to meet the reporting requirements of the Markets in Financial Instruments Directive (MiFID). It operates as a reporting hub to multiple regulators (competent authorities) within the EU/EEA.

TRAX2 builds on the success of the original TRAX system, successfully operated by ICMA since 1989, which has over 200 subscribers and processed over 45.5 million transactions in 2006 alone.

ICMA/2007/15

TRAX2 is available to any financial institution active in the international capital market, ICMA members and non members alike and is being rolled out over the next 12 months, assisting financial institutions with their matching, reporting and regulatory requirements.

TRAX2 is the ideal trade matching and reporting solution it offers subscribers:

- Full repo matching capabilities (buy and sell side)
- Rapid identification of problem trades and greatly reduced failed trades
- Regulatory reporting hub to facilitate MiFID Article 25
- Real time trade matching and reporting of bonds, derivatives and equities
- Real time exchange of standing settlement instructions (SSI's) between counterparties
- New ISO 15022/20022 messaging allowing for easy systems integration
- Highly competitive transaction costs

TRAX2 already offers multiple reporting to:

- Financial Services Authority (UK)
- London Stock Exchange (UK)
- Virt-x (UK)
- Bank of Belgium

## 2. International Capital Market Association (ICMA)

The International Capital Market Association is the self-regulatory organisation and trade association representing constituents and practitioners in the international capital market worldwide. ICMA's members are located in 48 countries across the globe, including all the world's main financial centres, and currently number some 400 firms in total. ICMA performs a crucial central role in the market by providing and enforcing a self-regulatory code of industry-driven rules and recommendations which regulate issuance, trading and settlement in international fixed income and related instruments. ICMA liaises closely with regulatory and governmental authorities, both at the national and supranational level, to ensure that financial regulation promotes the efficiency and cost effectiveness of the capital market.
