Sustainability Bond Guidelines

Introduction

A market has developed for bonds aligned to both the Green Bond Principles (GBP) and the Social Bond Principles (SBP) (referred to as the “Principles”). These transactions reflect the continuing development of the use of proceeds bond market. Specific examples of such transactions can be found on the Resource Centre at <https://www.icmagroup.org/green-social-and-sustainability-bonds/resource-centre/>.

These guidelines have been published to confirm the relevance of the Principles in this context and facilitate the application of their guidance on transparency and disclosure to the Sustainability Bond market. The common four core components of the Principles and their recommendations on the use of external reviews and impact reporting therefore also apply to Sustainability Bonds.

The goal of this document is to promote the integrity of the Sustainability Bond market and to ensure that issuers are better able to anticipate and fulfil the expectations of investors. It aims to facilitate the availability of information for the review and evaluation of expected or realized positive green and social impacts by investors. It also assists underwriters by promoting the expected disclosure of information and methodology.

Sustainability Bond definition

Sustainability Bonds are bonds where the proceeds will be exclusively applied to finance or re-finance a combination of both Green and Social Projects. Sustainability Bonds are aligned with the four core components of both the GBP and SBP with the former being especially relevant to underlying Green Projects and the latter to underlying Social Projects.

It is understood that certain Social Projects may also have environmental co-benefits, and that certain Green Projects may have social co-benefits. The classification of a use of proceeds bond as a Green Bond, Social Bond, or Sustainability Bond should be determined by the issuer based on its primary objectives for the underlying projects.

It is important to note that Sustainability Bonds should not be considered fungible with bonds that are not aligned with the four core components of the Principles.

Resource Centre

Recommended templates and Green, Social and Sustainability Bond resources are being made available at the Resource Centre at <https://www.icmagroup.org/green-social-and-sustainability-bonds/resource-centre/>. Completed templates can be published online for market information at the Resource Centre by following the instructions at the link above.

Note

The four types of Green Bonds and Social Bonds referred to in the Appendix I of the GBP and the SBP respectively would also apply to Sustainability Bonds, when Green and Social Projects are combined.

It is also recognised that there is a market of sustainability themed bonds, including those linked to the Sustainable Development Goals (“SDGs”), in some cases issued by organisations that are mainly or entirely involved in sustainable activities, but their bonds are not aligned to the four core components of the Principles. In such cases, investors will

need to be informed accordingly and care should be taken to not imply GBP or SBP features by a Sustainability Bond or SDG reference. These organisations are encouraged to adopt where possible the relevant best practice of the GBP and SBP (e.g. for reporting) for such existing sustainability, SDG or otherwise themed bonds, and to align future issues with the Principles.

A mapping of the GBP and SBP to the Sustainable Development Goals (SDGs) is now available and aims to provide a broad frame of reference by which issuers, investors and bond market participants can evaluate the financing objectives of a given Green, Social or Sustainability Bond/Bond programme against the SDGs. It can be found on the ICMA website at <https://www.icmagroup.org/green-social-and-sustainability-bonds/>.

Disclaimer

The Sustainability Bond Guidelines provide voluntary process guidelines that neither constitute an offer to purchase or sell securities nor constitute specific advice of whatever form (tax, legal, environmental, accounting or regulatory) in respect of Sustainability Bonds or any other securities. The Sustainability Bond Guidelines do not create any rights in, or liability to, any person, public or private. Issuers adopt and implement the Sustainability Bond Guidelines voluntarily and independently, without reliance on or recourse to the Sustainability Bond Guidelines, and are solely responsible for the decision to issue Sustainability Bonds. Underwriters of Sustainability Bonds are not responsible if issuers do not comply with their commitments to Sustainability Bonds and the use of the resulting net proceeds. If there is a conflict between any applicable laws, statutes and regulations and the guidelines set forth in the Sustainability Bond Guidelines, the relevant local laws, statutes and regulations shall prevail.
