Executive Summary

In June 2019, the European Repo and Collateral Council (ERCC) of the International Capital Market Association (ICMA) conducted the 37th in its series of semi-annual surveys of the repo market in Europe. The latest survey asked a sample of financial institutions in Europe for the value and breakdown of their repo contracts that were still outstanding at close of business on June 5, 2019. Replies were received from 55 offices of 51 financial groups, mainly banks. Returns were also made directly by the principal automatic repo trading systems (ATS) and tri-party repo agents in Europe.

Total repo business

The total value of the repo contracts outstanding on the books of the 55 institutions who participated in the latest survey was **EUR 7,761 billion**, compared with the EUR 7,846 billion in December 2018, a rise of 5.6% year-on-year but a fall in the headline number of 1.1% since the June 2018 survey.

Trading analysis

Directly-negotiated repo (including tri-party repo) recovered sharply, despite increased electronic business transacted over automatic repo trading systems (ATS). This was largely due to a drop in the volume of business through voice-brokers to a new all-time low.

Geographical analysis

Cross-border business fell back slightly and domestic business more so, reflecting a surge in CCP-cleared (anonymous) electronic repo. There was a jump in domestic business on ATS, driven by repo against Italian government securities.

Clearing and settlement analysis

Tri-party repo in the survey continued to recover, rising to 8%.

Cash currency analysis

The US dollar fell back, largely to the benefit of the euro.

Collateral analysis

The share of EU government bonds rose to their highest level since 2002. Italian government securities were a major driver. The share of German collateral touched a record low.

Maturity analysis

Short-dated repos recovered at the expense of repos between one and three months, possibly due to seasonal factors. However, the weighted average term to maturity lengthened significantly. The share of forward repos fell back from its record high.

Concentration analysis

The concentration of business within the top 20 participants in the survey sample was significantly reduced.

Chapter 1: The Survey

On June 5, 2019, the European Repo and Collateral Council (ERCC) of the International Capital Market Association (ICMA) conducted the 37th in its series of semi-annual surveys of the repo market in Europe.

The survey was managed and the results analysed on behalf of ICMA by the author, who is based at the ICMA Centre at Reading University in England, under the guidance of the ERCC Steering Committee ("ERCC Committee").

1.1 What the survey asked

The survey asked financial institutions operating in a number of European financial centres for the value of the cash side of repo and reverse repo contracts still outstanding at close of business on Wednesday, June 5, 2019.

The questionnaire also asked these institutions to analyse their business in terms of: the currency; the type of counterparty, contract and repo rate; the remaining term to maturity; the method of settlement; and the origin of the collateral. In addition, institutions were asked about securities lending and borrowing conducted on their repo desks.

The detailed results of the survey are set out in Appendix C. An extract of the accompanying Guidance Notes is reproduced in Appendix A.

Separate returns were made directly by the principal automatic repo trading systems (ATS) and tri-party repo agents in Europe. Once again, no return was made by the London-based European Venues and Intermediaries Association (EVIA), formerly the Wholesale Market Brokers' Association (WMBA), because of an insufficient number of respondents.

1.2 The response to the survey

The latest survey was completed by 55 offices of 51 financial groups. This is three fewer than in the December 2018 survey. Five institutions dropped out of the survey and two rejoined.

41 of the participants were headquartered across 14 European countries, including Norway (1) and Switzerland (2). Others were headquartered in Australia (1), Japan (4) and North America (8). 22 respondents were affiliates of foreign parents. Most (19) were located in the UK. 38 participants were headquartered across 14 of the 28 member states of the EU (there were no institutions in the survey from Finland and Sweden, and only one from a former Accession State). 29 participants were headquartered across 12 of the 19 countries of the eurozone.

Many institutions provided data for their entire European repo business. Others provided separate returns for one or more (but not necessarily all) of their European offices. A list of the institutions that have participated in the ICMA's repo surveys is contained in Appendix B.

1.3 The next survey

The next survey is scheduled to take place at close of business on Wednesday, December 11, 2019.

Any financial institution wishing to participate in the next survey will be able to download copies of the questionnaire and accompanying Guidance Notes from ICMA's web site. The latest forms will be published shortly before the next survey at the following website: **www.icmagroup.org/surveys/repo/participate**.

Questions about the survey should be sent by e-mail to **reposurvey@icmagroup.org**. Institutions who participate in a survey receive, in confidence, a list of their rankings in the various categories of the survey.

Chapter 2: Analysis of Survey Results

The aggregate results of the latest two surveys and of the surveys in each June in the four previous years (2015-2019) are set out in Appendix C. The full results of all previous surveys can be found at **www.icmagroup.org**.

Due to a late correction in the response by a large participant to the December 2018 survey, there has been a significant change to the headline number of that survey and small revisions to other data.

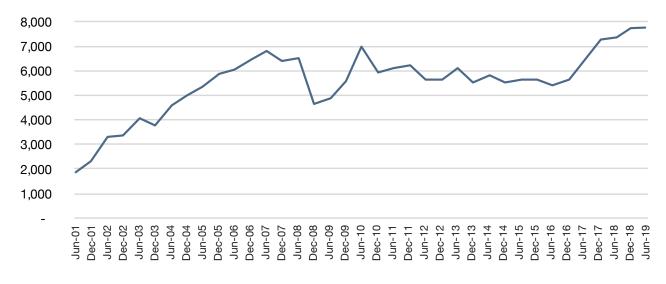

Total repo business (Q1)

The total value, at close of business on June 5, 2019, of repos and reverse repos outstanding on the books of the 55 institutions which participated in the latest survey was **EUR 7,761.4 billion**, compared with a revised total for December 2018, which was EUR 7,845.6 billion. This means the latest survey showed a rise of 5.6% year-on-year but a fall in the headline number of 1.1% since the December 2018 survey. Average daily tumover over the six months since the previous survey was about EUR 840 billion per day, which was 1.6% higher than the second-half of 2018.

Table 2.1 – Total repo business from 2001 to June 2019 (EUR billion)

survey	total	repo	reverse repo
2019 June	7,761	48.1%	51.9%
2018 December	7,846	48.5%	51.5%
2018 June	7,351	48.7%	51.3%
2017 December	7,250	47.8%	52.2%
2017 June	6,455	48.5%	51.5%

2014 June	5,782	48.6%	51.4%
2013 December	5,499	49.2%	50.8%
2013 June	6,076	49.8%	50.2%
2012 December	5,611	49.1%	51.9%
2012 June	5,647	48.7%	51.3%
2011 December	6,204	50.3%	49.7%
2011 June	6,124	50.7%	49.3%
2010 December	5,908	51.0%	49.0%
2010 June	6,979	53.5%	46.5%
2009 December	5,582	50.0%	50.0%
2009 June	4,868	52.2%	47.8%
2008 December	4,633	49.9%	50.1%
2008 June	6,504	48.8%	51.2%
2007 December	6,382	49.4%	50.6%
2007 June	6,775	50.8%	49.2%
2006 December	6,430	50.7%	49.3%
2006 June	6,019	51.7%	48.3%
2005 December	5,883	54.6%	45.4%
2005 June	5,319	52.4%	47.6%
2004 December	5,000	50.1%	49.9%
2004 June	4,561	50.6%	49.4%
2003 December	3,788	51.3%	48.7%
2003 June	4,050	50.0%	50.0%
2002 December	3,377	51.0%	49.0%
2002 June	3,305	50.0%	50.0%
2001 December	2,298	50.4%	49.6%
2001 June	1,863	49.6%	50.4%

It is important to remember that the survey measures the value of outstanding transactions at close of business on the survey date. Measuring the **stock** of transactions at one date, rather than the **flow** between two dates, permits deeper analysis but is difficult to reconcile with the flow numbers published by some other sources. As the survey is a 'snapshot' of the market, it can miss peaks and troughs in business between survey dates, especially of very shortterm transactions

In addition, the values measured by the survey are 'gross' figures, which mean that they have not been adjusted for the double counting of the same transactions between pairs of survey participants. However, a study (see the report of the December 2012 survey) suggested that the problem of double-counting was not very significant.

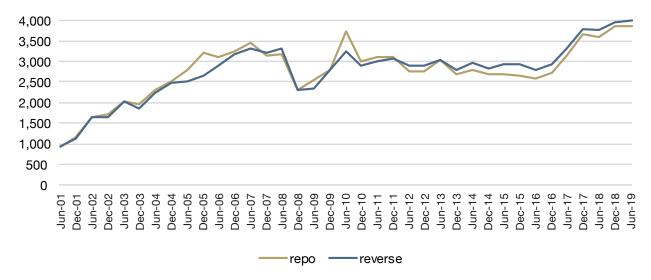

Nor does the survey measure the value of repos transacted with central banks as part of official monetary policy operations, which continue to be very substantial.

In order to accurately gauge the growth of the European repo market (or at least that segment represented by the institutions who have participated in the survey), it is not valid to simply compare headline numbers. Some of the changes will represent the entry and exit of institutions into and out of the survey, mergers between banks and the reorganization of repo books within banks. To overcome the problem caused by changes in the sample of survey participants, comparisons are made of the aggregate outstanding contracts reported by a sub-sample of institutions which have participated continuously in several surveys.

Out of the 55 institutions in the latest survey, 52 have participated in all of the last three surveys. Overall, the aggregate value of outstanding repos and reverse repos transacted by that constant sample of these 52 institutions grew by 5.6% year-on-year but fell by 1.2% since the December 2018 survey, much the same as for the headline number. The change for the 54 institutions which participated in the last two surveys was the same.

The repo books of 32 of the 55 institutions in the latest survey contracted or did not change. The unweighted mean percentage change fell back to 44.7% from a revised 50.8% in December. The median percentage change declined to +2.5% from a revised 3.4%. The survey sample slightly increased its role as a net lender to the rest of the market.

Trading analysis (Q1.1)

	June 2019		December 2018		June 2018	
	share	users	share	share	share	users
direct	61.6%	55	59.9%	58	60.6%	62
of which tri-party	8.0%	38	6.9%	42	6.0%	43
voice-brokers	8.1%	40	10.8%	42	11.4%	48
ATS	30.3%	45	29.3%	44	28.0%	44

Table 2.2 – Trading analysis

The share of directly-negotiated repo (including tri-party repo) recovered sharply, despite increased electronic business transacted over automatic repo trading systems (ATS), largely due to a drop in the volume of business through voicebrokers to an all-time low. However, the absolute size of the business reported directly by the four principal ATS operating in Europe (as opposed to electronic business reported by the survey participants: the ATS were BrokerTec, Eurex Repo, MTS Repo and SIX Repo) contracted to EUR 1,083.5 billion from EUR 1,137 billion in December.

The share of tri-party business by the survey sample that was repo (cash borrowing, as opposed to reverse repo or cash lending) fell to 70.8% from 72.9% in December. And there was a swing in GC financing (which combines CCP clearing and tri-party collateral management) back to providing net funding for the survey sample (72.0% compared to 40.2% in December).

ATS (which is an interdealer market) continued to be used for net lending by the survey sample (48.6% repo versus 51.4% reverse repo).

	Jun-19	Dec-18	Jun-18	Dec-17	Jun-17	Dec-16
ATS	45	44	44	44	48	51
anonymous ATS	40	40	40	40	42	42
voice-brokers	40	42	48	46	45	48
tri-party repos	38	42	43	44	43	44
total	55	58	62	64	64	65

Table 2.3 – Numbers of participants reporting particular types of business

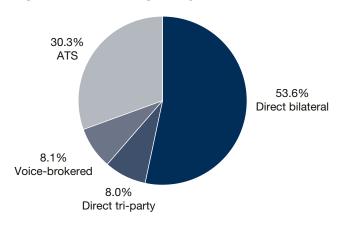

Figure 2.3 - Trading analysis

Geographical analysis (Q1.1)

Table 2.4 – Geographical analysis

	June 2019		December 2018		June 2018	
	share	users	share	users	share	users
domestic	25.5%		27.1%		25.5 %	
cross-border to (other) eurozone	17.0%		15.6%		15.6%	
cross-border to (other) non-eurozone	35.3%		37.3%		38.7%	
anonymous	22.3%	40	20.0%	40	20.2%	40

Cross-border business fell back slightly and domestic business more so, reflecting a surge in CCP-cleared electronic repo. There was a jump in domestic business on ATS, driven by repo against Italian government securities.

Table 2.5 – Geographical comparisons in June 2019 (December 2018)

	main survey	ATS	tri-party	EVIA (WMBA)
domestic	25.5% (27.1%)	46.1% (34.0%)	31.9% (32.3%)	
cross-border	52.3% (52.9%)	50.5% (66.0%)	68.1% (67.7%)	
anonymous	22.3% (20.0%)			

Figure 2.4 - Geographical analysis

Clearing and settlement analysis (Q1.2 and Q1.8)

The value of outstanding repo business managed by the four tri-party agents who contributed directly to the survey (Bank of New York Mellon, Clearstream, Euroclear, and SIS) recovered to EUR 663.9 billion from EUR 615.0 billion in December. Within tri-party business, the share of GC financing (mainly through Eurex Repo's Euro GC Pooling but also LCH's EuroGC Plus) reached 10.9% from 10.2% of the tri-party business reported by the survey sample and 10.5% from 9.3% of directly-reported tri-party repo. GC financing again increased its share of electronic business, growing to 3.8% from 3.6% of business reported directly by ATS but the absolute size of the business fell to EUR 41.4 billion from EUR 43.2 billion in December. The size of GC financing reported directly by the tri-party agents (which is a better total measure of this business) recovered to EUR 69.4 billion from EUR 57.0 billion.

The share of transactions negotiated directly or via voice-brokers that were subsequently registered with a CCP was unchanged at 6.9%.

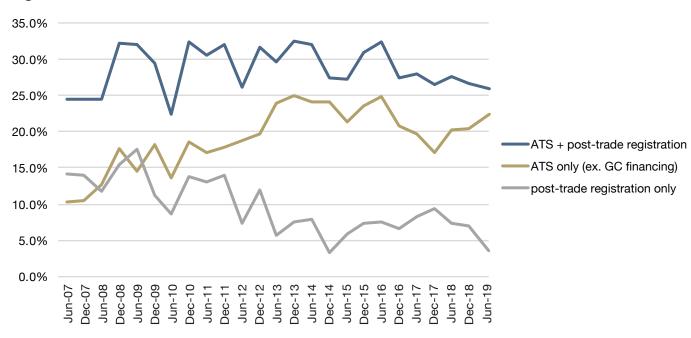

Figure 2.5 – Evolution of business cleared across CCP

Cash currency analysis (Q1.3 and Q1.4)

Table 2.6 – Cash currency analysis

	June 2019	December 2018	June 2018
EUR	62.0%	59.7%	65.3%
GBP	13.3%	13.2%	12.8%
USD	17.0%	19.4%	13.7%
DKK, SEK	1.7%	1.6%	1.9%
JPY	4.5%	4.5%	4.6%
CHF	0.0%	0.0%	0.0%
other APAC	0.4%	0.6%	0.7%
etc	1.0%	1.0%	1.0%
cross-currency	1.5%	2.4%	1.7%

The biggest change in currency composition since the previous survey was a relapse in the share of the US dollar to 17.0% from a record 19.4% in December. This largely benefitted the euro. There were larger changes in the shares of the dollar and euro in tri-party business.

Figure 2.6 - Currency analysis

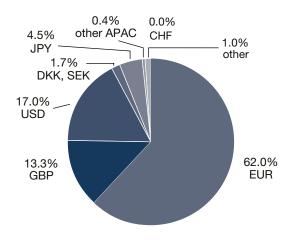

Table 2.7 – Currency comparison in June 2019

	main survey	ATS	tri-party	EVIA (WMBA)
EUR	62.0%	91.4%	51.9%

Collateral analysis (Q1.9)

Table 2.8 – Collateral analysis

	June 2019	December 2018	June 2018
Germany	16.4%	17.1%	19.8%
Italy	14.8%	12.6%	11.7%
France	14.0%	13.5%	15.4%
Belgium	3.5%	3.7%	3.4%
Spain	5.2%	4.8%	6.1%
other eurozone	5.1%	5.3%	5.5%
UK	13.2%	13.6%	13.2%
DKK, SEK	2.0%	1.8%	2.2%
international financial institutions	0.5%	0.7%	0.6%
US Treasuries	6.4%	8.9%	4.3%
other US	2.1%	2.6%	0.8%
former Accession	0.4%	0.6%	0.6%
Japan government	3.6%	3.5%	4.0%
other Japan	0.2%	1.3%	0.9%
other OECD ex APAC	4.8%	4.2%	5.2%
other APAC OECD	1.8%	0.4%	1.3%
eurobonds	1.6%	1.8%	1.8%
other fixed income	3.8%	3.6%	3.0%
equity	0.4%	0.2%	0.2%

The share of government bonds within the pool of EU-originated fixed-income collateral reported in the survey rose sharply to 89.9% from 87.0%, the highest level since 2002. Italian government securities were a major driver. The share of German collateral touched 16.4%, a record low. These changes were reflected in the data reported directly by the ATS, on which Italian government securities surged back to 36.4% from 30.9% in December, largely at the expense of German government securities, which fell back to 19.4% from 25.8%.

	June 2019	December 2018	June 2018
AAA	22.2%	23.7%	23.7%
AA	25.3%	24.8%	24.7%
Α	14.2%	12.3%	11.5%
BBB	14.5%	13.9%	13.7%
below BBB-	6.4%	6.3%	6.1%
A1/P1	2.3%	2.2%	2.8%
A2/P2	0.5%	0.7%	0.5%
Non-Prime	0.0%	0.0%	0.0%
unrated	14.6%	16.0%	17.0%

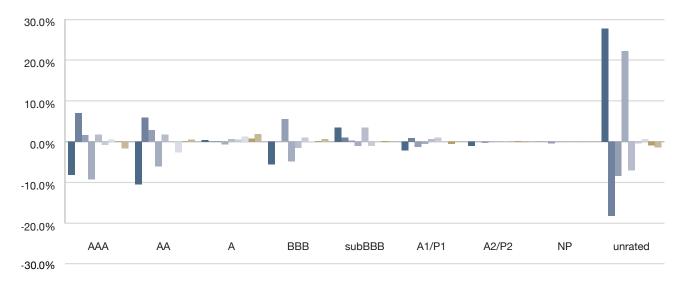

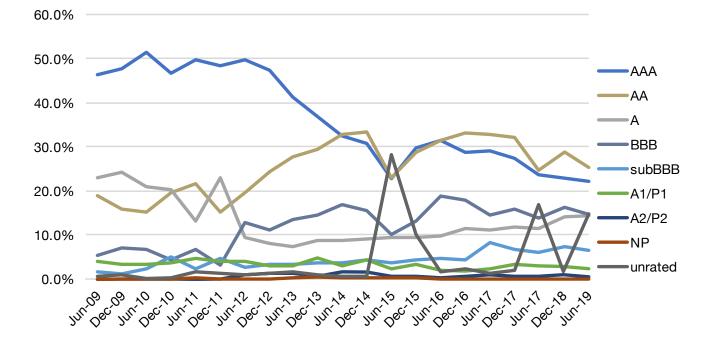

Figure 2.8 - Collateral analysis (tri-party agents) by credit rating

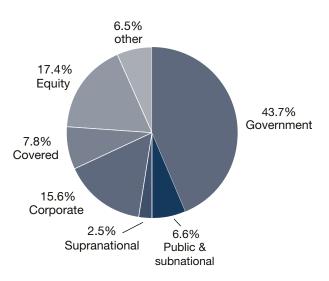

Table 2.10 - Tri-party repo collateral analysed by type of asset

	June 2019	December 2018	June 2018
government securities	43.7%	47.2%	43.8%
public agencies / sub-national governments	6.6%	9.4%	11.4%
supranational agencies	2.5%	2.5%	2.4%
corporate bonds	15.6%	16.3%	16.6%
covered bonds	7.8%	7.7%	6.7%
residential mortgage-backed	1.3%	1.6%	1.3%
commercial mortgage-backed	0.3%	0.2%	0.1%
other asset-backed	1.5%	1.2%	0.9%
CDO, CLN, CLO, etc	1.3%	1.2%	1.0%
convertible bonds	1.2%	1.4%	1.5%
equity	17.4%	10.3%	13.4%
other	0.9%	1.2%	1.0%

A decline in the shares of EU non-government and non-OECD securities was mirrored in larger shares for EU government securities (excluding UK gilts) as collateral in tri-party repo as reported directly by the tri-party agents. Eurobonds also accounted for a larger share of tri-party collateral allocations.

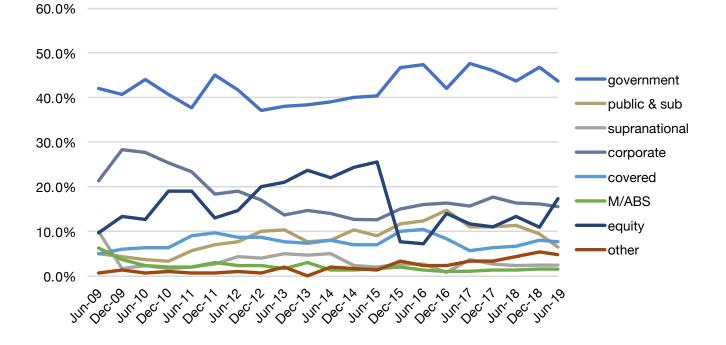

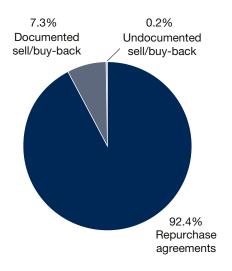

Figure 2.11 - Historic collateral analysis (tri-party agents) by type of asset

Table 2.11 - Tri-party repo collateral haircuts analysed by type of asset

(weighted average haircuts)	June 2019	December 2018	June 2018
government securities	2.3%	2.6%	2.7%
public agencies / sub-national governments	2.8%	2.7%	2.5%
supranational agencies	1.9%	2.7%	1.9%
corporate bonds (financial)	5.8%	5.6%	6.1%
corporate bonds (non-financial)	0.0%	0.0%	0.1%
covered bonds	2.6%	3.4%	3.1%
residential mortgage-backed	6.8%	6.5%	6.3%
commercial mortgage-backed	0.0%	0.070	0.3%
other asset-backed	3.1%	4.8%	3.9%
CDO, CLN, CLO, etc	6.0%	5.1%	4.1%
convertible bonds	1.8%	5.9%	8.5%
equity	4.4%	7.0%	7.1%
other	3.8%	2.6%	2.7%

Contract analysis (Q1.5)

Figure 2.12 - Contract analysis

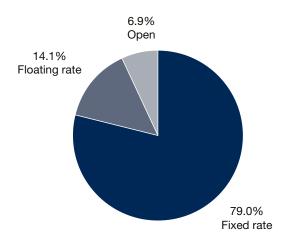

In the latest survey, respondents were asked to report the total number of repo master agreements which they had in place and the number of these agreements which were the ICMA's Global Master Repurchase Agreement (GMRA). Among the banks that responded, there was an average of over 600 agreements in place, of which, some 78% were GMRAs, confirming the status of this agreement as a global standard. Other agreements took a larger than average share at German, Japanese and US banks, which would appear to reflect their large domestic markets, where local agreements are more common.

Table 2.12 – Contract comparison in December 2018 (June 2018)

	main survey	ATS	tri-party
repurchase agreements	92.4% (93.3%)	90.9% (92.6%)	100.0% (100.0%)
documented sell/buy-backs	7.3% (6.5%)	9.1% (7.4%)	
undocumented sell/buy-backs	0.2% (0.2%)		

Repo rate analysis (Q1.6)

Figure 2.13 - Repo rate analysis

Floating-rate repo accounted for a significantly higher share of repo traded on ATS and, to a lesser extent, among the survey sample.

Table 2.13 – Repo rate comparison in December 2018 (June 2018)

	main survey	ATS	tri-party
fixed rate	79.0% (81.1%)	78.7% (85.4%)	17.1% (21.9%)
floating rate	14.1% (12.9%)	21.3% (14.6%)	7.4% (9.5%)
open	6.9% (5.9%)		75.5% (68.6%)

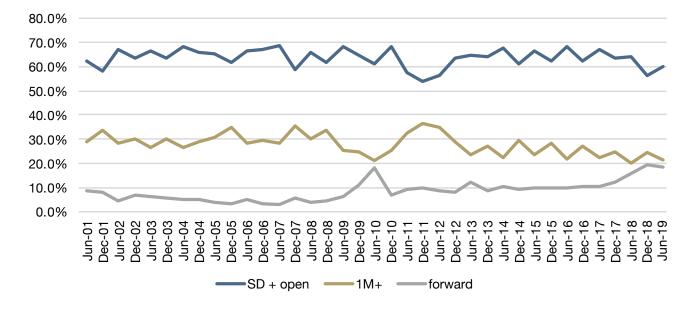

Maturity analysis (Q1.7)

Table 2.14 – Maturity analysis

	June 2019	December 2018	June 2018
open	6.6%	5.8%	6.3%
1 day	17.1%	18.5%	18.9%
2 days to 1 week	18.4%	17.2%	21.7%
1 week to 1 month	18.0%	14.5%	16.9%
>1 month to 3 months	11.1%	16.0%	11.2%
>3 months to 6 months	4.6%	3.8%	4.3%
>6 months to 12 months	3.2%	3.3%	3.3%
>12 months	2.5%	1.4%	1.3%
forward-start	18.5%	19.5%	16.1%

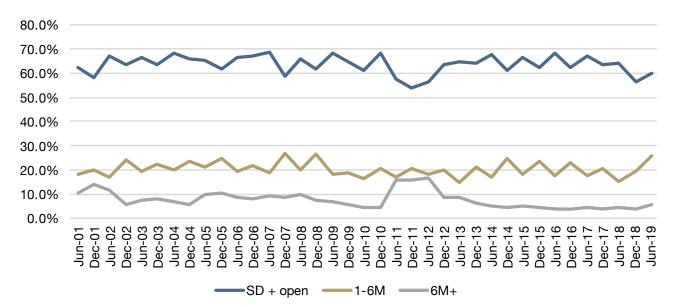

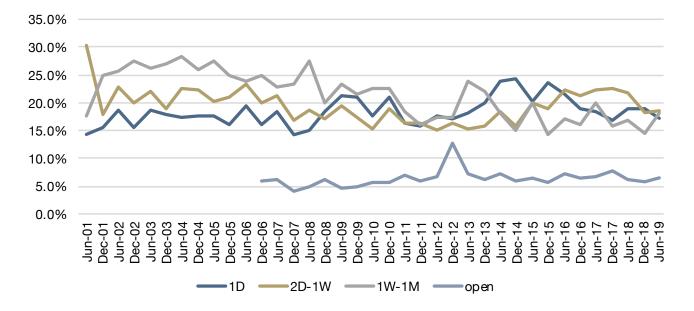

Figure 2.17 – Maturity analysis: breakdown of short dates plus open (main survey)

The share of short-dated repos (one month or less remaining to maturity) recovered to 53.5% from 50.2%. Maturities between two days and one month expanded but fell back sharply between one and three months. These changes may reflect seasonal factors, in particular, increased demand for high-quality liquid assets to meet regulatory liquidity ratios at year-end and reduced demand in between. However, the weighted average term to maturity lengthened significantly to 30-69 days from 24-59 days (the lower end of the range assumes that all transactions have the minimum term in each maturity band: the upper end assumes the maximum term). The share of forward repos fell back to 18.5% from a record 19.3% in December.

Overall, the market as represented by the survey sample was a net cash borrower in short-dated repos and a net lender in other maturity brackets including.

>12 months	2.5% (1.4%)	0.5% (0.1%)	3.0% (3.1%)	
forward-start	18.5% (19.5%)	0.5% (0.4%)		

Product analysis (Q2)

The share of securities lending conducted on repo desks retreated to 12.1% from 13.4%.

Figure 2.20 - Product analysis

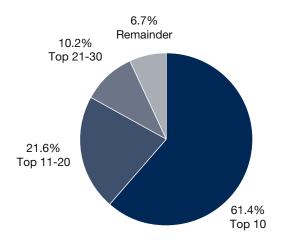

Concentration analysis

Table 2.16 – Concentration analysis

	June 2019	December 2018	June 2018
top 10	61.4%	67.7%	64.4%
top 20	83.1%	86.3%	85.6%
top 30	93.3%	95.0%	94.0%
other	6.7%	5.0%	6.0%

Figure 2.21 - Concentration analysis

The concentration of business within the top 20 survey participants dropped significantly and was reflected in the Herfindahl Index, which fell to 5.4%.

¹ The Herlindahl Index is the sum of the squares of market shares divided by the square of the sum of market shares. The higher the index, the lower the degree of competition. If the index is higher, the more a single institution has a dominant market share and/or the more insignificant the market shares of all the other survey participants. A market in which several institutions have very large market shares can therefore have a relatively low index

Chapter 3: Conclusion

The European repo market survey, suggests the recovery of the market, as represented by the survey sample, that has been in progress since 2016 has paused, albeit close to its record level. The slowdown in the repo market may have reflected the impact on financial markets of increased uncertainty in the global economy and the effect of inverting yield curves on fixed-income trading. One exception to this was Italian government bonds, which continued to recapture share in the repo market and performed very strongly in the first-half of 2019. Italian securities have been favoured by investors in their search for yield, notwithstanding continued concerns about economic and financial stability in Italy. German securities on the other hand look to have suffered from increasingly negative yields.

The end of quantitative easing in the eurozone at the end of 2018 may have boosted the recovery of tri-party repo, which is a source of general collateral funding that has suffered from the plentiful supply of central bank money.

The latest survey confirmed the role of the ICMA's Global Master Repurchase Agreement (GMRA) as the standard legal agreement for repo in the cross-border and many domestic markets. Some 78% of legal agreements reported by the survey were GMRAs.

About the Author

This report was compiled by Richard Comotto, who is a Senior Visiting Fellow at the ICMA Centre at the University of Reading in England. He is also a Senior Consultant to the ICMA's financial crisis, he has been advising the ICMA's European, author of the ICMA's 'Guide to Best Practice in the European Repo Market' and its Repo FAQs, Course Director of the ICMA Professional Repo Market Course and of the ICMA-ISLA GMRA-GMSLA Workshop, and a lead in the ICMA's work on SFTR.

The author acts as an independent consultant providing research, advice and training on the international money, securities and derivatives markets to professional market associations, government agencies, regulatory authorities, international financial institutions, banks, brokers and financial information services. This includes advising technical assistance missions by the IMF, World Bank, other multilateral development banks and other organizations to build repo markets in emerging economies.

The author has written a number of books and articles on a range of financial topics, including the foreign exchange and money markets, swaps and electronic trading systems. He takes particular interest in the impact of electronic trading systems on the bond and repo markets. Following the financial crisis, he has been advising the ICMA's European Repo and Collateral Council on regulatory initiatives and has produced a series of papers: in July 2010, a 'White paper on the operation of the European repo market, the role of short-selling, the problem of settlement failures and the need for reform of the market infrastructure'; in September 2011, 'Interconnectivity of central and commercial bank money in the clearing and settlement of the European repo market'; in February 2012, 'Haircuts and Initial Margins in the Repo Market'; in March 2012, 'Shadow Banking and Repo'; and in 'Collateral damage: the impact of the Financial Transaction Tax on the European repo market' in April 2013.

The author served for ten years at the Bank of England, within its Foreign Exchange Division and on secondment to the International Monetary Fund in Washington DC.

Appendix A: Survey Guidance Notes

The following extract is based on the Guidance Notes issued to participants in conjunction with the survey that took place on Wednesday, June 5, 2019.

The data required by this survey are: the total value of the repos and reverse repos booked by your repo desk that are still outstanding at close of business on Wednesday, June 5, 2019, and various breakdowns of these amounts, as well as the total value of all repos and reverse repos turned over the six months since the previous survey (which was on December 5, 2018).

Branches of your bank in other countries in Europe may be asked to complete separate returns. If your repo transactions are booked at *another branch*, please forward the survey form to that branch. If branches of your bank in *other countries* run their own repo books, please copy the survey form to these branches, so that they can also participate in the survey. Please feel free to copy the survey form to other banks, if you discover that they have not received it directly.

Guidance Notes

General guidance

- a) Please fill in as much of the form as possible. For each question that you answer, you will receive back your ranking in that category.
- b) If your institution does not transact a certain type of repo business, please enter 'N/A' in the relevant fields. On the other hand, if your institution does that type of business but is not providing the data requested by the survey, please do not enter anything into the relevant field. If your institution does that type of business but has no transactions outstanding, please enter zero into the relevant field.
- c) You only need to give figures to the *nearest million*. However, if you give figures with *decimal points*, please use full stops as the symbols for the decimal points, *not* commas. For *nil returns*, please use zeros, *not* dashes or text.
- d) Please do not re-format the survey form, ie change its lay-out, and do not leave formulae in the cells of the underlying spreadsheet.
- e) Include all varieties of repos, ie repurchase transactions (classic repos and pensions livrées) and sell/buy-backs (e.g. simultaneas and PCT). There is a separate question (see question 2) on securities lending and borrowing transactions (including securities lending and borrowing against cash collateral).
- f) Exclude repo transactions undertaken with central banks as part of their official money market operations. Other repo transactions with central banks, e.g. as part of their reserve management operations, should be included.
- g) Give the value of the *cash* which is due to be repaid on all repo and reverse repo contracts (*not* the market value or nominal value of the collateral) that are still *outstanding at close of business on Wednesday, June 5, 2019*. This means the value of transactions at their repurchase prices.
- h) "Outstanding" means repos and reverse repos with a repurchase date, or which will roll over, on or after Thursday, June 6, 2019. You should include all open repos and reverse repos that have been rolled over from Wednesday, June 5, 2019, to a later date and all forward-forward repos and reverse repos that are still outstanding as forward contracts at close on Wednesday, June 5, 2019.
- i) Give separate totals for (a) repos plus sell/buy-backs and (b) reverse repos plus buy/sell-backs.
- j) The survey seeks to measure the value of repos and reverse repos on a *transaction date basis*, rather than a purchase date basis. This means that you should include all repo and reverse repo contracts that have been agreed **before** close of business on Wednesday, June 5, 2019, even if their purchase dates are later. An unavoidable consequence of using the transaction date is that tom/next and spot/next transactions that are rolled over will be counted more than once, eg a tom/next repo transacted on the day before the survey date and rolled over on the survey date will feature twice.
- k) Give *gross* figures, i.e. do *not* net opposite transactions with the same counterparty. If this is not possible, please indicate that your figures are net.
- I) In the case of equity repo, for synthetic structures, please give the value of the cash payment.
- m) You should include *intra-group* transactions between different legal entities or between foreign branches and the parent company.

Guidance on specific questions in the survey form

- 1.1 Transactions (1.1.1) direct with counterparties or (1.1.2) through voice-brokers should *exclude* all repositransacted over an ATS (see below). These should be recorded under (1.1.3).
 - (1.1.2) Transactions through voice-brokers should be broken down in terms of the location of the counterparties, rather than the location of the voice-brokers.
 - (1.1.3) "ATSs" are automatic trading systems (e.g. BrokerTec, Eurex Repo and MTS, but not voice-assisted electronic systems used by voice-brokers or automated systems such as Bloomberg). Transactions through voice-assisted systems should be included in (1.1.2). Anonymous transactions through an ATS with a central counterparty (e.g. CC&G, LCH, MEFF and Eurex Clearing) should be recorded in either (1.1.3.4) or (1.1.3.5). (1.1.3.4) is for GC financing systems. These are ATS that are connected to a CCP **and** a tri-party repo service. Examples include Eurex Euro GC Pooling (EGCP) and LCH's €GCPlus. They do not include GC basket trading on ATS in which the seller selects the securities to be delivered from a list prescribed by the ATS. This activity may be cleared across a CCP but does not involve a tri-party service, and should be recorded in (1.1.3.5).
- 1.2 This item includes all the transactions recorded in (1.1.3) **plus** any transactions executed directly with counterparties and via voice-brokers which are then registered with and cleared through a central counterparty.
- "Repurchase transactions" (also known as "classic repos") include transactions documented under the Global 1.5 Master Repurchase Agreement (GMRA) 1995, the Global Master Repurchase Agreement (GMRA) 2000 or the Global Master Repurchase Agreement (GMRA) 2011 without reference to the Buy/Sell-Back Annexes, and transactions documented under other master agreements. "Sell/buy-backs" are therefore taken to include all transactions that are not documented. Repurchase transactions are characterised by the immediate payment by the buyer to the seller of a compensatory or manufactured payment upon receipt by the buyer of a coupon or other income on the collateral held by the buyer. If a coupon or other income is paid on collateral during the term of a sell/buy-back, the buyer does not make an immediate compensatory or manufactured payment to the seller, but reinvests the income until the repurchase date of the sell/buy-back and deducts the resulting amount (including reinvestment income) from the repurchase price that would otherwise be due to be received from the seller. Sell/buy-backs may be quoted in terms of a forward price rather than a repo rate. Where sell/ buy-backs are documented (e.g. under the Buy/Sell-Back Annexes to the GMRA 1995, 2000 or 2011), periodic adjustments to the relative amounts of collateral or cash - which, for a repurchase transaction, would be performed by margin maintenance transfers or payments - are made by adjustment or re-pricing. All open repos are likely to be repurchase transactions.
- 1.6 "Open" repos are defined for the purposes of this survey as contracts that have no fixed repurchase date when negotiated but are terminable on demand by either counterparty. This item should be equal to item (1.8.3). Open repos could be regarded as floating-rate, given that rates may be updated, but this tends to be irregular, so open repos are being treated separately from floating-rate repo (1.6.2).
- 1.7 This section asks for the *remaining* term to maturity (not the original term to maturity) of repos to be broken down as follows:
 - (1.7.1.1) 1 day this means:
 - all contracts transacted prior to Wednesday, June 5, 2019, with a repurchase date on Thursday, June 6, 2019;
 - overnight, tom/next, spot/next and corporate/next contracts transacted on Wednesday, June 5, 2019.
 - (1.7.1.2) 2-7 days this means:
 - all contracts transacted prior to Wednesday, June 5, 2019, with a repurchase date on Friday, June 7, 2019, or any day thereafter up to and including Wednesday, June 12, 2019;
 - contracts transacted on Wednesday, June 5, 2019, with an original repurchase date on Friday, June 7, 2019, or any day thereafter up to and including Wednesday, June 12, 2019 (irrespective of the purchase date, which will vary).
 - (1.7.1.3) More than 7 days but no more than 1 month this means:
 - all contracts transacted prior to Wednesday, June 5, 2019, with a repurchase date on Thursday, June 13, 2019, or any day thereafter up to and including Monday, July 5, 2019;
 - contracts transacted on Wednesday, June 5, 2019, with an original repurchase date on Thursday, June 13, 2019, or any day thereafter up to and including Monday, July 5, 2019 (irrespective of the purchase date, which will vary).

- (1.7.1.4) More than 1 month but no more than 3 months this means:
- all contracts transacted prior to Wednesday, June 5, 2019, with a repurchase date on Tuesday, July 6, 2019, or any day thereafter up to and including Thursday, September 5, 2019;
- contracts transacted on Wednesday, June 5, 2019, with an original repurchase date on Tuesday, July 6, 2019, or any day thereafter up to and including Thursday, September 5 2019 (irrespective of the purchase date, which will vary).

(1.7.1.5) More than 3 months but no more than 6 months – this means:

- all contracts transacted prior to Wednesday, June 5, 2019, with a repurchase date on Friday, September 6, 2019, or any day thereafter up to and including Thursday, December 5, 2019;
- contracts transacted on Wednesday, June 5, 2019, with an original repurchase date on Friday, September 6, 2019, or any day thereafter up to and including Thursday, December 5, 2019 (irrespective of the purchase date, which will vary).
- (1.7.1.6) More than 6 months but no more than 12 months this means;
- all contracts transacted prior to Wednesday, June 5, 2019, with a repurchase date on Friday, December 6, 2019, or any day thereafter up to and including Friday, June 5, 2020;
- contracts transacted on Wednesday, June 5, 2019, with an original repurchase date on Friday, December 6, 2019, or any day thereafter up to and including Friday, June 5, 2020 (irrespective of the purchase date, which will vary).

(1.7.1.7) More than 12 months – this means;

- all contracts transacted prior to Wednesday, June 5, 2019, with a repurchase date on Monday, June 8, 2020, or any day thereafter;
- contracts transacted on Wednesday, June 5, 2019, with an original repurchase date on or after Monday, June 8, 2020 (irrespective of the purchase date, which will vary).
- (1.7.2) For repos against collateral that includes a transferable security regulated under the EU MiFID and that have been traded or which it is possible to trade on a MiFIR-regulated trading venue (regulated market, multilateral trading facility or organised trading facility), forward-forward repos are defined for the purposes of this survey as contracts with a purchase date of Monday, June 10, 2019, or later. There is therefore an overlap with corporate/next transactions. If the latter cannot be identified separately, it is accepted that they will be recorded as forward-forward repos. It does not matter than many repos may actually be traded for T+1 (ie a purchase date of Thursday, June 6, 2019). For repos transacted in the OTC market or against collateral not regulated under MiFID, the definition of forward-forward may be different.
- (1.7.3) Open repos in this field should equal open repos in item (1.6.3).
- 1.8 Please confirm whether the transactions recorded in the questions in (1.6 and 1.7) include your tri-party repo business. Some institutions do not consolidate their tri-party repo transactions with their direct or voice-brokered business because of delays in receiving reports from tri-party agents or the complexity of their tri-party business.

(1.8.1) and (1.8.2) should not include any repos transacted across GC financing systems and recorded in (1.8.3).

- 1.9 "Eurobonds" (also known as "international bonds") are defined as securities held outside national central securities depositories (CSD), usually in an ICSD such as Clearstream or Euroclear, or a custodian bank; typically with the ISIN prefix XS; often issued in a currency foreign to the place of issuance; and sold cross-border to investors outside the domestic market of the place of issuance. Eurobonds should be recorded in (1.9.30-33), except for those issues by "official international financial institutions", which should be recorded in (1.9.20). Eurobond does not mean a bond denominated in euros.
 - (1.9.20) "Official international financial institutions, including multilateral development banks" such as:

African Development Bank (AfDB)

Asian Development Bank (AsDB)

Bank for International Settlements (BIS)

Caribbean Development Bank (CDB)

Central American Bank for Economic Integration (CABEI)

Corporacion Andina de Fomento (CAF)

East African Development Bank (EADB)

- European Bank for Reconstruction and Development (EBRD)
- European Commission (EC)/European Financial Stability Mechanism (EFSM)

European Financial Stability Facility (EFSF)

European Investment Bank (EIB)

European Stabilisation Mechanism (ESM)

Inter-American Development Bank Group (IADB)

International Fund for Agricultural Development (IFAD)

Islamic Development Bank (IDB)

Nordic Development Fund (NDF)

Nordic Investment Bank (NIB)

OPEC Fund for International Development (OPEC Fund)

West African Development Bank (BOAD)

World Bank Group (IBRD and IFC)

In addition, securities issued by the EU should be included.

- (1.9.21) "US Treasury" includes bills, notes and bonds, including floating-rate notes, issued by the US central government but not securities guaranteed by that government, such as Agency securities.
- (1.9.23) "Japanese government" includes bills, notes and bonds issued by the Japanese central government but not securities guaranteed by that government.
- (1.9.25) "Other OECD countries" are Australia, Canada, Chile, Iceland, Israel, Korea, Mexico, New Zealand, Norway, Switzerland and Turkey.
- (1.9.26) "Other non-OECD European, Middle Eastern & African countries" should exclude any EU countries.
- (1.9.34) "Equity" includes ordinary shares, preference shares and equity-linked debt such as convertible bonds.
- 2.1 This question asks for the total gross value of transactions with a transaction date on or after December 6, 2018 (the day after the previous survey date), to and including June 5, 2019 (the latest survey date). In other words, it asks for the **turnover** or flow of business over the six month interval and includes all business transacted since the last survey date, even if it has matured before the survey date. This section is therefore different from the rest of the survey, which asks for the value of business outstanding on the survey date, in other words, the stock of transactions.
- 2.2 This question asks for the **number** of individual transactions with a transaction date on or after December 6, 2018 (the day after the previous survey date), to and including June 5, 2019 (the latest survey date), even if it has matured before the survey date. In other words, this is the number of tickets written.
- 3 "Total value of securities loaned and borrowed by your repo desk" includes the lending and borrowing of securities with either cash or securities collateral. Exclude any securities lending and borrowing done by desks other than your repo desk. If your repo desk does not do any securities lending and borrowing, this line will be a nil return.
- 4.1 "Active" means about once a week or more often.

For further help and information

If, having read the Guidance Notes, you have any further queries, please e-mail the ICMA Centre at **reposurvey@icmagroup.org**. This survey is being conducted by the ICMA Centre, University of Reading, UK, at the request of ICMA's European Repo and Collateral Council (ERCC).

Appendix C: Summary Of Survey Results

	Jun-15	Jun-16	Jun-17	Jun-18	Dec-18	Jun-19
Q1 What are the total gross values of cash due to be repaid by you and repaid to you on repo transactions maturing after survey date? (figures in EUR billions)	5,612	5,379	6,455	7,351	7,846	7,761
Of the amounts given in response to question (1) above:						
1.1 How much was transacted:						
direct with counterparties						
• in the same country as you	14.2%	13.9%	14.3%	15.0%	16.5%	17.2%
 cross-border in (other) eurozone countries 	13.8%	11.9%	12.4%	11.9%	10.3%	12.0%
 cross-border in non-eurozone countries 	29.6%	30.1%	35.7%	33.7%	32.9%	32.3%
through voice-brokers						
• in the same country as you	5.1%	5.2%	5.4%	5.8%	4.7%	4.0%
 cross-border in (other) eurozone countries 	3.2%	3.1%	2.9%	2.6%	3.3%	3.1%
• cross-border in non-eurozone countries	3.5%	2.8%	2.7%	3.0%	2.8%	1.0%
on ATSs with counterparties						
• in the same country as you	4.1%	4.0%	4.0%	4.7%	5.4%	4.2%
 cross-border in (other) eurozone countries 	4.2%	3.2%	1.6%	1.1%	1.9%	1.9%
 cross border-border in non-eurozone countries 	1.0%	0.9%	1.3%	1.9%	2.0%	1.9%
 anonymously across a GC financing system 	4.1%	3.5%	1.1%	1.0%	1.1%	1.1%
 anonymously across a central clearing counterparty but not GC financing 	17.2%	21.4%	18.6%	19.3%	19.3%	21.1%
• total through a central clearing counterparty	27.2%	32.4%	28.0%	27.6%	27.2%	25.9%
1.2 How much of the cash is denominated in:						
• EUR	63.4%	61.3%	61.9%	65.3%	60.5%	62.0%
• GBP	11.3%	11.6%	12.2%	12.8%	12.4%	13.3%
• USD	16.4%	17.1%	16.9%	13.7%	19.4%	17.0%
• SEK, DKK	2.4%	2.6%	2.7%	1.9%	1.6%	1.7%
• JPY	5.3%	5.2%	4.5%	4.6%	4.5%	4.5%
• CHF	0.1%	0.0%	0.0%	0.0%	0.0%	0.0%
 other Asian and Pacific currencies 		0.5%	0.7%	0.7%	0.6%	0.4%

	Jun-15	Jun-16	Jun-17	Jun-18	Dec-18	Jun-19
• other currencies	1.1%	1.6%	1.0%	1.0%	1.0%	1.0%
1.3 How much is cross-currency?	2.6%	1.5%	0.0%	1.7%	2.5%	1.5%
1.4 How much is:						
• classic repo	84.0%	82.6%	85.7%	92.4%	93.1%	92.4%
 documented sell/buy-backs 	15.0%	15.5%	12.9%	7.3%	6.7%	7.3%
• undocumented sell/buy-backs	1.0%	1.9%	1.4%	0.3%	0.2%	0.2%
1.5 How much is:						
• fixed rate	81.9%	82.5%	80.9%	72.5%	80.7%	79.0%
floating rate	11.5%	10.8%	12.7%	21.1%	13.1%	14.1%
• open	6.5%	6.7%	6.4%	6.4%	6.1%	6.9%
1.6 How much fixed and floating rate repo is (1.6.1) for value before (survey date) and has a remaining term to maturity of:						
• 1 day	20.2%	21.6%	18.4%	18.9%	18.9%	17.1%
• 2 - 7days	20.1%	22.4%	22.3%	21.7%	17.5%	18.4%
 more than 7 days but no more than 1 month 	19.9%	17.2%	20.0%	16.9%	14.6%	18.0%
 more than 1 month but no more than 3 months 	13.0%	13.1%	12.6%	11.2%	16.1%	11.1%
 more than 3 months but no more than 6 months 	5.3%	4.5%	4.9%	4.3%	3.6%	4.6%
• more than 6 months	3.6%	2.7%	3.2%	3.3%	2.5%	3.2%
• more than 12 months	1.4%	1.4%	1.5%	1.3%	1.4%	2.5%
forward-forward repos	10.0%	9.8%	10.5%	16.1%	19.3%	18.5%
• open	6.5%	7.3%	6.6%	6.3%	6.0%	6.6%
1.7 How much is tri-party repo:	9.3%	10.0%	7.8%	6.0%	6.9%	8.0%
• for fixed terms to maturity	99.2%	91.1%	83.5%	78.9%	79.6%	82.4%
• on an open basis	8.2%	9.2%	6.0%	10.9%	8.0%	6.6%
GCF			10.5%	10.2%	12.4%	10.9%
1.8 How much is against collateral issued in:						
Austria						
• by the central government	0.9%	0.7%	0.8%	0.9%	0.9%	0.8%
• by other issuers	0.1%	0.0%	0.1%	0.1%	0.1%	0.1%

Appendix D: The ICMA European Repo And Collateral Council

The ICMA European Repo and Collateral Council (ERCC) (formerly the ICMA European Repo Council) is the forum where the repo dealer community meets and forges consensus solutions to the practical problems of a rapidly evolving marketplace. In this role, it has been consolidating and codifying best market practice. The contact and dialogue that takes place at the ERCC underpins the strong sense of community and common interest that characterises the professional repo market in Europe.

The ERCC was established in December 1999 by the International Capital Market Association (ICMA, which was then called the International Securities Market Association or ISMA) as a body operating under ICMA auspices.

Membership of the ERCC is open to any ICMA member to commence, dedicated repo or collateral market activity, is willing to abide by the rules and has sufficient professional expertise, financial standing and technical resources to meet its obligations as a member.

The ERCC meets twice a year (usually in February/March and September) at different financial centres across Europe. The Steering Committee now comprises 19 members elected annually and meets six or seven times a year.

More information about the ERCC is available on <u>www.icmagroup.org</u>.
